EDUCATION

University of Tehran (UT), Tehran, Iran, Sep. 2018 - present
Master of Science, Computer Architecture
Thesis: FPGA-based Multi-precision Accelerator for Deep Neural Networks
Cumulative GPA: **17.3/20 (3.53/4)**¹

Amirkabir University of Technology (AUT), Tehran, Iran Sep. 2014 - Sep. 2018
Bachelor of Science, Computer Engineering, Computer Architecture Systems
Thesis: Implementation of a Tracking System Using LoRaWAN Protocol
GPA (last 3 semesters): **17.81/20 (3.74/4)**
Cumulative GPA: **17.2/20 (3.52/4)**²

National Organization for Development of Exceptional Talents (NODET), Birjand, Iran
Diploma, Mathematics and Physics Sep. 2010 - Jun 2014
Cumulative GPA: **19.68/20**

RESEARCH INTERESTS

- Hardware Accelerators
- Reconfigurable Computing
- Embedded Systems
- FPGA
- Deep Neural Networks
- Approximate Computing

RESEARCH EXPERIENCES

- **Research Assistant in Network on Chip Laboratory**, University of Tehran 2018 - present
Supervised by Dr. Mehdi Modarressi

In this laboratory, I'm working on implementation of an FPGA based multi-precision accelerator for deep neural networks. This architecture is able to change the working bit-width dynamically according to the minimum bit-width required to preserve the original accuracy. The multipliers and bit-width adaption mechanism is optimized for the LUT-based structure of FPGAs.

- **Researcher in Digital System Design Lab**, Amirkabir University of Technology 2017 - 2018
Supervised by Dr. Mahmoud Momtazpour and Dr. Morteza Sahebzamani

In this laboratory we were working on Amirkabir University of Technology IoT Gateway Project.

TEACHING EXPERIENCES

- **Teaching Assistant**, Computer Aided Digital, Under Supervision of Dr. Mehdi Modarressi 2019
- **Lab Instructor**, Logic Circuit Laboratory Course 2018
- **Teaching Assistant**, Computer Networks, Under Supervision of Dr. Siavash Khorsandi 2017
- **Teaching Assistant**, Digital Design Automation, Under Supervision of Dr. Morteza - Sahebzamani 2017
- **Teaching Assistant**, Electrical Circuit1, Under Supervision of Dr. Siavash Khorsandi 2016
- **Teaching Assistant**, Logic Circuits, Under Supervision of Dr. Mehdi Sedighi 2016

¹Selected Courses GPA: 18.23/20(4/4): Neural Networks 17.7, Computer Arithmetics 19.06, Chip Multiprocessor 19, Advanced Computer Architecture 17.17, Fault Tolerant Systems 18.7, Interconnection Networks 19.3

²Computer Architecture related courses' GPA: 18.61/20(4/4): Logic Circuits 18.4, Computer Architecture 17.54, Electronic Circuits 19.54, Computer Aided Digital System Design 18, Digital Electronics 17.2, Operating System Design 19.2, VLSI Systems Design 18.8, Engineering Mathematics 19.5, Embedded & Real-Time Systems 19, Data Communications 19

HONOR & AWARDS

Ranked Top 3 in term of GPA, among Computer Architecture Students in AUT	2019
Eligible to study in two fields simultaneously because of Top GPA	2015
Ranked top 0.6% out of 222,500, Nationwide University Entrance Exam, Mathematics	2014

PRACTICAL EXPERIENCES

- Completed "Convolutional Neural Networks" Online Course by deeplearning.ai on coursera.org 2020
- Completed "Neural Networks and Deep Learning" Online Course by deeplearning.ai on coursera.org 2019
- Completed "Improving Deep Neural Networks: Hyperparameter tuning, Regularization and Optimization" Online Course by deeplearning.ai on coursera.org 2019
- Attended Third IPM³ Advanced School on Computing, Computer Architecture 2019
- Attended 8th IPM-HPC Workshop on Multi-core Systems and Parallel Platforms 2019
- Attended Introduction to FPGA Workshop, Co-design and hardware implementation, held in AUT 2016

NOTABLE COURSE PROJECTS

- Utilize OpenMp & CUDA to speed up CNN inference, (MultiCore Embedded Systems) 2020
- Forecast the number of taxi requests by RNN, (Deep Neural Networks) 2019
- Image Template Matching with CUDA, Implemented the Template Matching algorithm in CUDA & OpenMp, on a dataset of coin/face images. (Multi-Core Programming Course) 2018
- Temperature controller, using Wi-Fi development board (WEMOS D1) and LM35 and Android-Smartphone, (Computer Interface Design Course) 2018
- Implementing various projects for FRDM-KL25Z board, (Embedded Systems) 2018
- Implementing a home environment controller, using VHDL & Co-Design (Digital Design Automation) 2017
- Implementing SRAM, using HSpice (Digital Electronics) 2016
- Implementing an Engineering Calculator, using CORDIC IP Core 2016
- Implementing a Basic Computer, Cache and RAM, by VHDL (Computer Architecture) 2016
- Implementing Robo Kill game, using JAVA (Advanced Programming) 2015

TECHNICAL SKILLS

Programming: VHDL, Verilog, Co-Design, Python(Keras, Tensorflow, PyTorch), CUDA, OpenMP, C/C++, Java, Assembly

Frameworks & Scientific Tools: Visual Studio, Qt, MATLAB, Arduino IDE

Hardware CAD Tools: Vivado Design Suite, Xilinx ISE Design Suite, PSPICE, HSPICE, Modelsim, Proteus, Keil

Operating Systems: Microsoft Windows, Linux

Typesetting Tools: L^AT_EX, Microsoft office (Word, Powerpoint, Excel, Visio)

Languages: Persian (Native), English (Fluent)

³Institute for Research in Fundamental Sciences
